Personal

I had an interest in programming since i was 14 years old when i discovered scratch. Since then my passion for this field has only increased and i knew from the start that this was the career path i would choose.

I started to learn c and python in my high school years then i started to write a blog about python programming language for it to become a kind of notebook for me and anyone who wants to learn python.

As i was improving my coding skills on C and C++ languages in my university i also started to have an interest in machines. So then in my first summer holiday i got myself an arduino microcontroller to study about this interest of mine. This led me to have a minor education in mechatronics in my university

So as a person who had a chance to made his passions into a career path, i am continuing to learn about this world's fascinating technologies day by day.

Education

Okyanus Collage

2018-2021

Joined O'MUN program
Representing Australia
In Economic and Social Council

Çankaya University

2022 - continues

Major - Computer Engineering
Minor - Mechatronics Engineering
Current GPA: 2.99

Skills

3D Mechanical Design

C / C++

Python

Arduino Code

Godot Game Engine

Project Management

AutoDesk Inventor
